

Battery Pack Charging

CHARGING INSTRUCTIONS:

1. Before connecting the charger to the battery pack, make sure the charger is OFF. (The ON/OFF switch is on the back side of the charger located by the power input.)
2. Once connection at the battery pack is made, turn the charger ON.
3. The digital display of the charger should display *TEST* and eventually time out and then display *H100* for a one hour charge.
4. When charge is complete, the charger will automatically shut off.
5. Turn the charger's power OFF and disconnect.

CHARGER DISPLAY CODES:

00U: Battery not connected or battery voltages are too low. (Check contacts for corrosion or damage.)

E3: Abnormal battery voltage. (Possible battery issue, contact Drag Packs for help.)

E5: Battery fault. (Possible battery issue, contact Drag Packs for help.)

TEST: ~3 minute battery diagnosis.

HXXX: Battery charge duration.

END: Charge complete.
